Contents

Abstract	583
1. LECTURE 1: Counting problems and volumes of strata	583
2. LECTURE 2: Lattice points and branched covers	586
3. LECTURE 3: The Oppenheim conjecture and Ratner's theorem	589
3.1. Counting cylinders and saddle connections	589
3.2. Oppenheim's conjecture	592
3.3. Ratner's theorem	593
Acknowledgements	594
References	594
